

OEM DIVISION

Concept to Production, Omni is your Total Source

At Omni Glass and Paint, we offer a wide variety of OEM services. Our state of the art facility utilizes the latest technology and allows us to stay current on industry trends, and provide our customers with superior fabrication, fit, and finish. We specialize in providing innovative new products, designed and manufactured right here in the USA. We supply only the highest quality glass products and will work closely with you to best meet your needs.

We specialize in the following:

1) Cab Glass and Windows for Construction, Military, Heavy Equipment, and Police & Fire Vehicles

Omni provides high quality cab glass for any variety of commercial and industrial cab configurations, including windshields, skylights, side windows, sliders, pop ups, and back glass.

2) Fire Rated Glass

By offering Pyroswiss and Keralite, we can provide fire and safety-rated glass at an economical price. It's easy to install and has high-impact strength and superior optical qualities. We apply a clear 3M Scotchshield ultra film to the glass surface to achieve CPSC Cat II high impact safety rating.

3) Heated Windshields

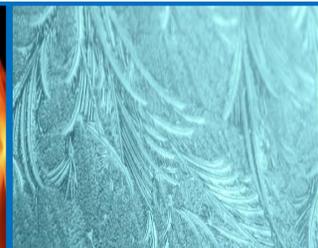

Omni provides heated windshields for any glass fabrication application. We can do it all in-house as one complete solution, saving you time and money.

4) Ballistic Glass

For durability in the field, our ballistic glass has an abrasion resistant surface for less marring in sandy, dirty environments. We also offer a rock strike face available to reduce cracks and chips, while traveling in rough off-road terrain.

5) Railway Glass

Our rail windows meets FRA Type I and II standards, and we can supply them in your required specifications. They are tested to ensure impact / ballistic resistance in accordance with FRA 49 CPR.
