

Filler Metals and Welding Rods

Product Trade Name/Product Classification(s): **STAINLESS STEEL WELDING ELECTRODES**

"ESSENTIALLY SIMILAR" to U.S. Department of Labor Form OSHA 20 (to comply with OSHA's Hazard Communication Standard 29 CFR 1910, 1200)

SECTION 1: Identification		SECTION 2: Hazardous Ingredients/Identity Info.

<p>SECTION 3: Physical Properties NOT APPLICABLE</p>		<p>SECTION 4: Fire and Explosion Hazard Data These products as shipped are non-hazardous, nonflammable, non-explosive, and non-reactive. Welding arc and sparks can ignite combustibles and flammables. Refer to American National Standard Z-49.1 for fire prevention during the use of welding procedures.</p>																																																																																																																																																																							
<p>SECTION 5: Reactivity Data</p> <p>HAZARDOUS DECOMPOSITION PRODUCTS:</p> <p>Welding gases cannot be classified simply. Their composition and quantities are dependent upon the metal being welded, the process, the procedures, and electrodes used. Other conditions which also influence the composition and quantity of the fumes and gases to which workers may be exposed include: coatings on the metal being welded (such as paint, plating, or galvanizing), number of welds and volume of work area, quality and amount of ventilation, position of welder's head with respect to the fume plume, as well as the presence of contaminants in the atmosphere (such as chlorinated hydrocarbon vapors from cleaning and degreasing activities). The primary route of entry of welding fumes and gases is by inhalation.</p> <p>When the electrode is consumed, the fume and gas decomposition products are different in percent and form from the ingredients listed in Section 2. Decomposition products include those originating from volatilization, reaction, or oxidation of the materials shown in Section 2 plus those from base metal, coating, etc., as noted in Section 6. These components are virtually always present as complex compounds and not as metals (Characterization of Arc Welding Fume: American Welding Society).</p> <p>One recommended way to determine the composition and quantity of fumes and gases to which worker's are exposed are to take an air sample inside the welder's helmet, if worn, or in the worker's breathing zone. See ANSI/AWS F1.1, available from the American Welding Society, P.O. Box 351040, Miami, FL 33135.</p>		<p>SECTION 6: Health Hazard Data</p> <p>THRESHOLD LIMIT VALUE: Reasonably expected fume or gas constituents of these products could include primary oxides of iron; secondarily complex oxides of manganese, silicon, chromium, and molybdenum along with fluorides. OSHA permissible exposure limits and ACGIH threshold limit values for nickel is 1.0mg/M³ and for hexavalent chromium is 0.05 mg/M³. Welding fumes also contain fluorides and OSHA (PEL) and ACGIH (TLV) limits are 2.5mg/M³. It is to be noted that all the above will result in a significant reduction from the 5mg/M³ general fume level.</p> <p>EFFECTS OF OVEREXPOSURE: FUMES AND GASES CAN BE DANGEROUS TO YOUR HEALTH. Aggravation of preexisting respiratory or allergic conditions may occur in some workers. Short-term (ACUTE) overexposure to welding fumes may result in discomfort such as: dizziness, nausea, and dryness or irritation of the nose, throat, or eyes. Long-term (CHRONIC) overexposure to welding fumes may lead to siderosis (iron deposits in the lung) and is believed by some investigators to affect pulmonary function. ARC RAYS can injure eyes and burn skin. ELECTRIC SHOCK CAN KILL. See Section 7.</p> <p>EMERGENCY & FIRST AID PROCEDURES: Call for medical aid. Employ first aid techniques recommended by the American Red Cross.</p>																																																																																																																																																																							
<p>SECTION 7: Precautions For Safe Handling And Use/Applicable Control Measures</p> <p>Read and understand the manufacturer's instructions and the precautionary label on this product. See American National Standard Z-49.1, Safety in Welding and Cutting, published by the American Welding Society, P.O. Box 351140, Miami, FL 33135 and OSHA Publication 2206 (29 C.R.F. 1910), U.S. Government Printing Office, Washington, D.C. 20402 for more detail.</p> <p>VENTILATION: Use enough ventilation, local exhaust at the arc, or both, to keep the fumes and gases below the TLV'S in the worker's breathing zone and the general area. Train the welder to keep his head out of the fumes.</p> <p>RESPIRATORY PROTECTION: Use respirable fume respirator or air-supplied respirator when welding in confined space or where local exhaust or ventilation does not keep exposure below TLV.</p> <p>EYE PROTECTION: Wear helmet or use face shield with filter lens. As a rule of thumb, start with a shade which is too dark to see the weld zone. Then go to the next lighter shade that gives sufficient view of the weld zone. Provide protective screens and flash goggles, if necessary, to shield others.</p> <p>PROTECTIVE CLOTHING: Wear head, hand, and body protection that help to prevent injury from radiation, sparks and electrical shock. See ANSI Z-49.1. At a minimum, this includes welder's gloves and a protective face shield and may include arm protectors, aprons, hats, shoulder protection, as well as dark substantial clothing. Train the welder not to touch live electrical parts and to insulate himself from work and ground.</p> <p>PROCEDURE FOR CLEANING OF SPILLS OR LEAKS: Not applicable.</p> <p>WASTE DISPOSAL METHOD: Prevent waste from contaminating surrounding environment. Discard any product, residue, disposable container, or liner in an environmentally acceptable manner, in full compliance with Federal, State, and Local regulations.</p>		<p>SECTION 8: DISCLAIMER</p> <p>ALTHOUGH REASONABLE CARE HAS BEEN TAKEN IN THE PREPARATION OF THE INFORMATION HEREIN, INWELD EXTENDS NO WARRANTIES, EXPRESS OR IMPLIED, MAKES NO REPRESENTATIONS AND ASSUMES NO RESPONSIBILITY AS TO THE ACCURACY OR SUITABILITY OF INFORMATION FOR APPLICATION TO PURCHASER'S INTENDED PURPOSE OR FOR CONSEQUENCES OF ITS USE. JUDGMENTS AS TO THE SUITABILITY OF INFORMATION FOR PURCHASER'S PURPOSES ARE PURCHASER'S RESPONSIBILITY.</p>
